CSS 3D Transforms

- CSS 3D transforms allows 3-Dimensional design.
- It will have configuration for X, Y and Z axis.
- The methods used for 3D are same as 2D but comprises of 3rd Dimension.

Translate3d()

- It sets the position of element along x, y and z axis.

  Syntax:

  translate3d(tx, ty, tz)

  Ex:

```
<!DOCTYPE html>
<html>
   <head>
      <title>Translate</title>
      <style>
         .container {
            width: 100px;
            height: 100px;
            border:5px solid darkcyan;
```

```
            background-image:
url("../Images/jblspeaker.jpg");
            background-size: 100px 100px;
            background-repeat: no-repeat;
            margin:20px;
        }
        img {
            width: 100px;
            height: 100px;
            border:1px dotted darkcyan;
            opacity: 0.8;
            box-shadow: -25px -25px 3px
darkcyan;
        }
        .transform-effect{
            transform: translate3d(0px, 0px, 0px);
            transition: 2s;
        }
        .transform-effect:hover {
            transform: translate3d(25px, 25px,
100px);
            transition: 2s;
        }
```

```
        </style>
    </head>
    <body>
        <div class="container">

                <img class="transform-effect"
src="../Images/jblspeaker.jpg">

        </div>
    </body>
</html>
```

Scale3d

- It changes the image size in 3 dimensions.

Syntax:

```
scale3d(x, y, z)
```

Ex:

```
<!DOCTYPE html>
<html>
    <head>
        <title>Translate</title>
        <style>
```

```
        .container {
            width: 200px;
            height: 100px;
            border:5px solid darkcyan;
            background-color: darkgray;
            margin:20px;
        }
        img {
            width: 100px;
            height: 100px;
            border:1px dotted darkcyan;
            opacity: 0.8;
        }
        .transform-effect{
            transform: scale3d(1,1,1);
            transition: 2s;
        }
        .transform-effect:hover {
            transform: scale3d(1.5,1.5,1.5);
            transition: 2s;
        }

    </style>
</head>
```

```
   <body>
      <div class="container">

            <marquee onmouseover="this.stop()"
onmouseout="this.start()"
scrollamount="10">
             <img class="transform-effect"
src="../Images/jblspeaker.jpg">
             <img class="transform-effect"
src="../Images/shoe.jpg">
             <img class="transform-effect"
src="../Images/shirt.jpg">
             <img class="transform-effect"
src="../Images/earpods.jpg">
            </marquee>

      </div>
   </body>
</html>
```
