

CSS Gradients

- Gradients allow multiple colors and their transitions.
- Gradients can be
 - Linear Gradients
 - Direction left, right, up and down
 - Radial Gradients
 - From center

Linear Gradients

- It defines colors for various directions left, right, up and down.
- Linear-gradient() is the method that configures colors.

Ex:

```
<!DOCTYPE html>
<html>
  <head>
    <title>Colors</title>
    <style>
      .colorbox {
        height: 200px;
        width: 400px;
```

```
        background-color: red;
        background-image: linear-gradient(red,
yellow);
    }
</style>
</head>
<body>
    <div class="colorbox">
    </div>
</body>
</html>
```

- Gradient directions
 - to right
 - to bottom
 - to left
 - to top
 - to bottom left

- to bottom right
- to top right
- to top left

Syntax:

linear-gradient(to bottom right, red, yellow)

Ex:

```
<!DOCTYPE html>
```

```
<html>
```

```
  <head>
```

```
    <title>Colors</title>
```

```
    <style>
```

```
      .colorbox {
```

```
        height: 200px;
```

```
        width: 400px;
```

```
        background-color: red;
```

```
        background-image: linear-gradient(to right,  
red, yellow);
```

```
      }
```

```
    </style>
```

```
  </head>
```

```
  <body>
```

```
<div class="colorbox">  
  
</div>  
</body>  
</html>
```

- **Gradient can be defined by using angle.**

- Angle is defined in deg.

Syntax:

background-image: linear-gradient(60deg, red, yellow);

- **Gradient can be defined with multiple colors.**

Syntax:

background-image: linear-gradient(90deg, red, yellow, green, blue);

- **Gradient can be transparent.**

You have to define rgba()

Syntax:

background-image: linear-gradient(90deg, rgba(255,0,0,0.4), yellow, green, blue);

- **Gradient can repeat.**

background-image: repeating-linear-gradient(red, yellow 10%, green 20%) ;

Radial Gradient:

- Set effects towards center

Syntax:

background-image: radial-gradient(red, yellow, green);

- Set shape for gradient

background-image: radial-gradient(circle, red, yellow, green);

- Repeating radial gradient

background-image: repeating-radial-gradient(red, yellow 10%, green 20%);
